

**BODY**

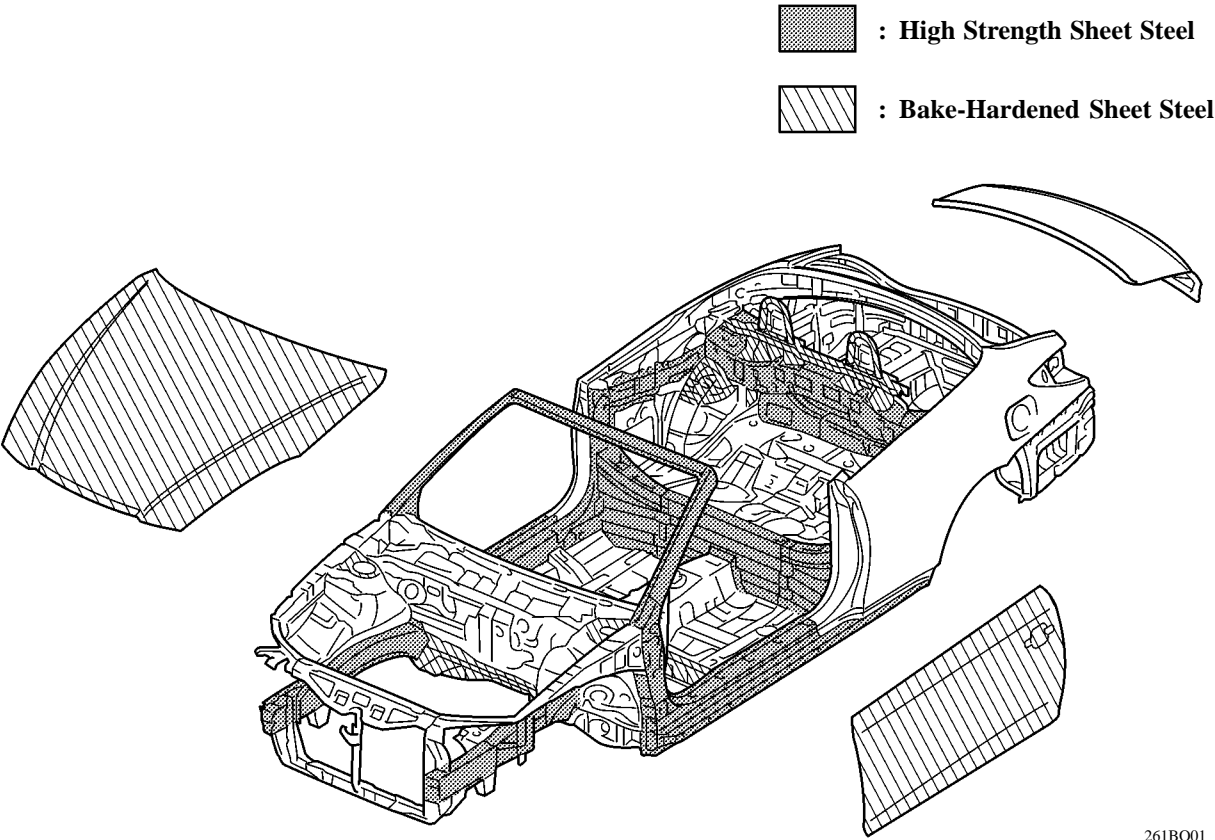

**■ LIGHTWEIGHT AND HIGHLY RIGID BODY**

**1. General**

The '04 Camry Solara Convertible model has adopted a softtop, convertible-type body construction that achieves both high rigidity and safety.

**2. High Strength Sheet Steel**

The body of the '04 Camry Solara Convertible has been made lightweight and highly rigid through the refinement of the shape and construction of each part, optimized allocation of reinforcements and members, and use of high strength and bake-hardened sheet steel.

3. Body Shell

The braces, gussets and members have been effectively located to ensure high rigidity and to realize excellent stability and controllability.

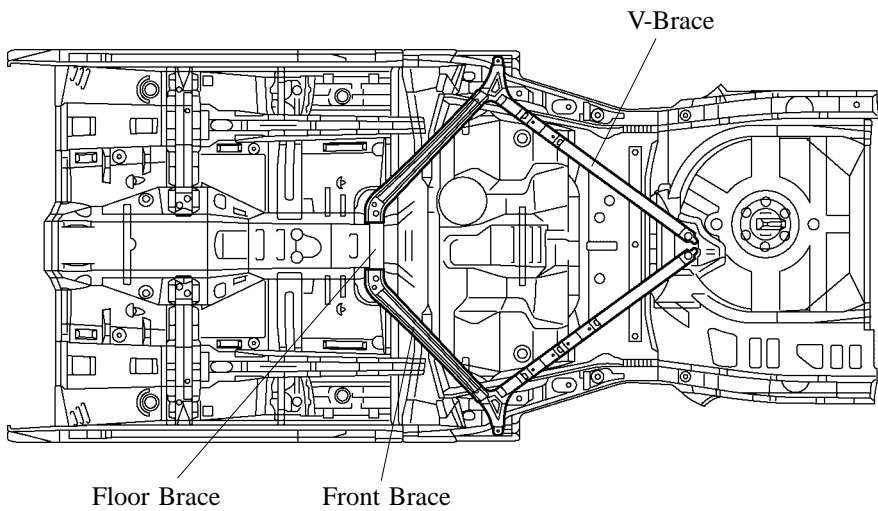

- Large section size and thick sheet metal of Rocker realized excellent body rigidity.
- Cross members are arranged effectively, thus ensure the high torsional rigidity.
- Reinforcements have been effectively located to ensure the joining of the Pillars and the Rocker.

 : Reinforcements

261B002

- By arranging braces under the floor, improvement of torsional rigidity of the body has been realized.
