

■LOW NOISE BODY

1. General

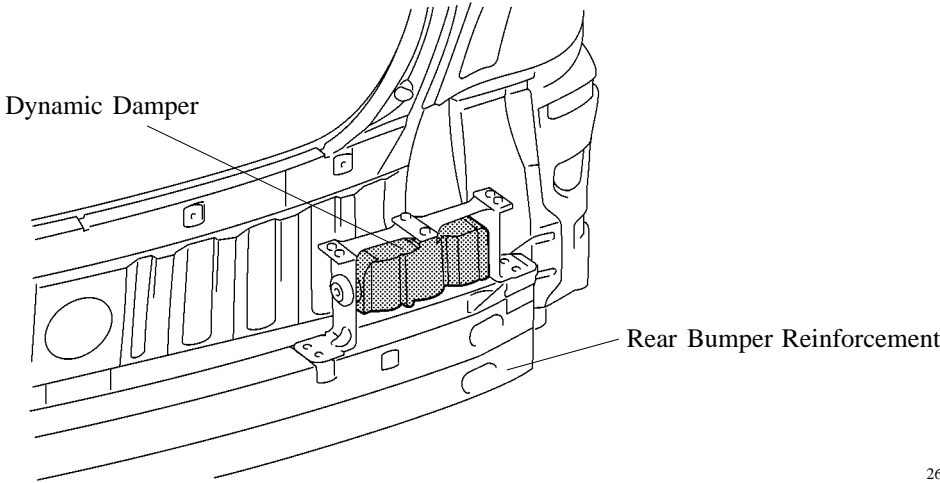

An effective application of vibration damping and noise suppressant materials reduce engine and road noise.

2. Sound Absorbing and Vibration Damping Materials

- Silencer pad and Resin formation type forming seal are applied to reduce the noise.
- Flash surface and double seal Weatherstrip section are applied to reduce the wind noise.

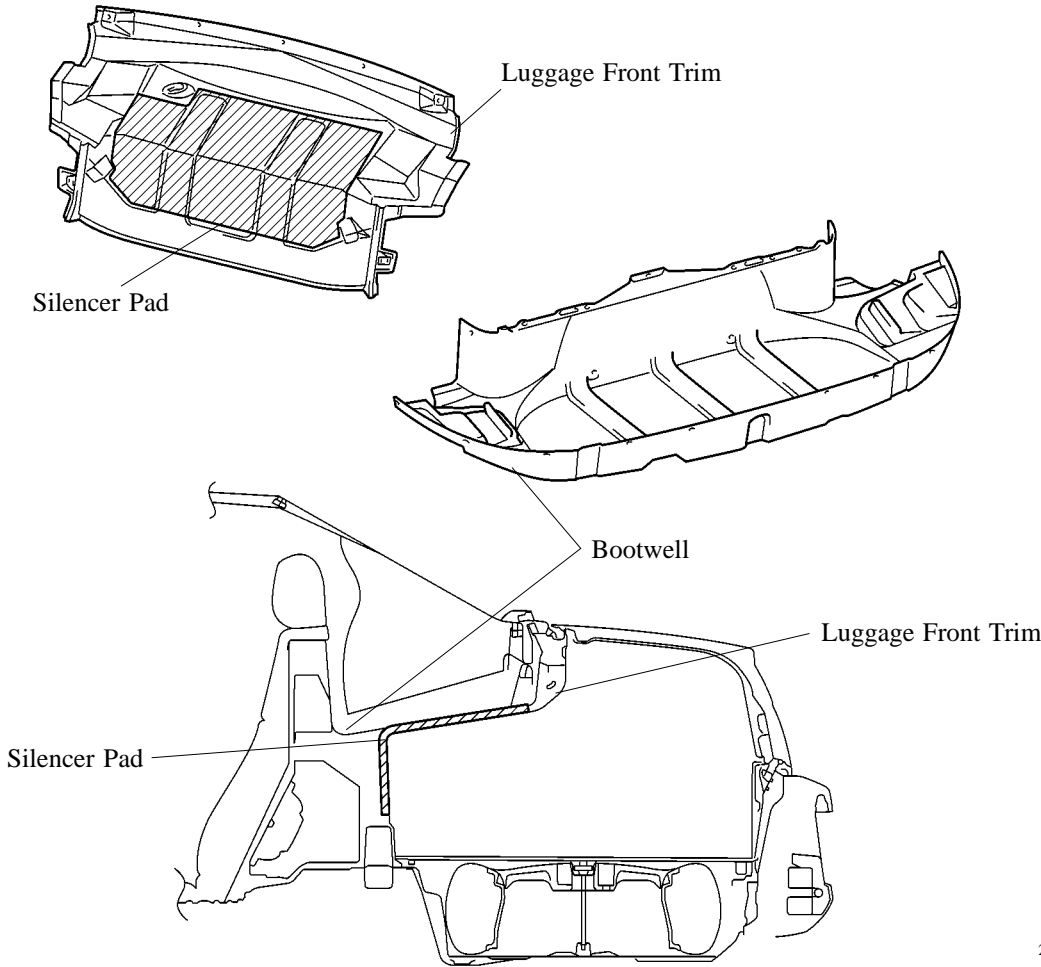

- A dynamic damper has been provided on the rear bumper reinforcement, which reduce the cowl shake.

261BO09

- A silencer pad has been adopted between the luggage front trim and the bootwell in order to minimize the entry of noise into the cabin.
